(LISTED BELOW)

SUPPLEMENT TO
REPORT NO.

1. A chemical factory near Bystrovany (P50/N95) (see Attachment I) is occupied with the filling of hand grenades. The trinitrotoluene used in this operation comes from Vsetin (P50/043). The plant employs between 200 and 300 men and is guarded by about 25 factory militiamen armed with rifles and automatic pistols. The main storehouse burned in August 1949, allegedly through sabotage.
2. The ammunition storehouse "Ve Vypade" near Olomouc (see Attachment II) is full. Nine civilian workers work full time loading and unloading ammunition, for which job each wears an all-rubber suit and a mask. There are two guards on duty at the storehouse at all times.
3. In the storehouse at the former air personnel barracks in Olomouc-Hejcin (see Attachment III) transmitters and receivers for aircraft radios are being stored.

- Attachments:
- I. Sketch map of the area of the chemical factory near Bystrovany.
 - II. Sketch map of the area of the ammunition stores "Ve Vypade" in Olomouc.
 - III. Sketch map of the area of the former aircraft barracks in Olomouc-Hejcin.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
